## ASSIST 4

**The modules of the ASSIST4 Suite offer all business services necessary to advance global trade processes.**

Freight forwarders and carriers can use AEB's Global Trade Solution Suite ASSIST4 to streamline and automate routines, enhancing their operational agility to better serve their customers. ASSIST4 offers clear cut ways to manage demanding freight jobs, from start to finish.

Warehouse Management

Transport Management

Freight Management

Customs Management

Monitoring & Alerting

Compliance

### Drive Increased Productivity

ASSIST4 not only maximizes efficiency, but its advanced functionalities shorten the processing time needed to create and manage customers' or carriers' bookings. As much as possible, information is entered into the system only once. Subsequent information requests are either pulled from the master files or copied from previous related entries. In addition, the bookings are created under a "wizard like" set up manner so that basic critical details can be captured from the customers quickly.

### Financial Transactions

ASSIST4 also supports you in managing payments to carriers and charges to customers. It encompasses multiple currencies requirements and integration to accounting systems. Management reports are readily available.

### Increase Revenue Opportunities

A powerful freight quote engine is built within ASSIST4. The users are able to quickly search for the cheapest carrier quotes maintained in the engine to maximize profits. In addition, all carriers'

and customers' cost components can be viewed under one screen to better manage all necessary charges.

### Exceed Customers' Expectations

Your users will be able to advise your customers on carriers' availabilities with the help of an intelligent search mechanism in ASSIST4. All related routes and charges information is at your users' fingertips to help them answer any inquiries easily and thus providing excellent customer service.

### Maximize ROI Minimum

With increased efficiencies, it is possible for freight forwarding companies to achieve fast Return On Investment with ASSIST4.
